

Decimal Subtraction Spin

Materials: one small paper clip, paper and pencils

1. Work with a partner. Collect one paper clip, a pencil and paper for recording.
2. Take turns to spin the spinner by placing a paper clip over a pencil tip. Put the pencil tip on the center of the spinner and flick the paper clip. Subtract the decimal number that the paper clip lands on from 100. Show your work.
3. Continue to take turns to spin and subtract until one player reaches zero. If a player goes below zero, the winner is the player closest to zero.
